

Tirik Coin Whitepaper (v1)

1. Introduction

Tirik Coin is a forward-thinking project built on the Solana blockchain, aiming to establish a modern digital financial ecosystem. Tirik integrates AI, E-commerce, Crypto Exchange, and Decentralized Payment Systems to power a fast-growing and user-driven platform.

2. Tirik's Vision

"Tirik empowers a growing ecosystem that includes AI programs, e-commerce integration, crypto exchange, and decentralized payment systems."

We believe blockchain technology is the foundation of future finance, and Tirik is committed to becoming a leader in digital economic transformation.

3. Tirik Token (TIRIK)

Blockchain: Solana

Token Standard: SPL

Total Supply: 1,000,000,000 TIRIK (1 Billion)

Circulating Supply at Launch: 100% - All tokens in circulation

Utility:

- Digital payments within the e-commerce marketplace
- Trading on Tirik Exchange
- Purchasing NFTs and digital services

- Access to staking, farming, and liquidity pools in DeFi systems

4. Roadmap

PHASE 1: Project Foundation & Token Launch

- Assemble core team and define project vision
- Develop and launch TIRIK SPL Token on Solana
- Launch official website and social media channels
- Release Whitepaper (v1)
- List TIRIK on Solana DEXs (Raydium, Jupiter)
- Launch airdrops and marketing campaigns

PHASE 2: Platform Development & Community Building

- Launch Tirik E-commerce Marketplace (Beta)
- Begin development of Tirik Crypto Exchange
- Create educational materials and user onboarding (wallets, trading, blockchain)
- Get listed on CoinGecko and CoinMarketCap
- Build strong local and global communities

PHASE 3: Payment Integration & Ecosystem Growth

- Integrate Solana Pay and custom payment APIs
- Release mobile wallet for iOS & Android
- Enable TIRIK Coin as a payment method on the e-commerce platform
- Introduce a native stablecoin (Tirik USD/USDT) for smoother transactions
- Launch merchant and user loyalty/revenue-sharing programs

PHASE 4: Full Exchange Launch & DeFi Expansion

- Launch Tirik Exchange with major trading pairs (SOL, USDC, BTC, TIRIK)
- Add staking, yield farming, and liquidity pools
- Integrate cross-chain bridges (Ethereum, BSC)
- Launch NFT Marketplace (e-commerce items and collectibles)
- Introduce DAO-based governance for product and feature upgrades

PHASE 5: Tirik Blockchain Development

- Start R&D for a custom Layer 1 blockchain (Tirik Chain)
- Launch Testnet (with validator recruitment, block explorer, and faucet)
- Migrate all services (e-commerce, exchange, payments) to native chain
- Conduct security audits and release SDKs for developers
- Launch community and investor reward programs

PHASE 6: Tirik Mainnet Launch & Regional Expansion

- Officially launch Tirik Mainnet Blockchain
- Migrate TIRIK token from Solana to Tirik native chain
- Form regional partnerships in America, Europe, and the Middle East
- Collaborate with governments and NGOs for payments and aid distribution
- Launch blockchain training programs, grants, and global hackathons

5. Conclusion

Tirik Coin is more than just a token-it's a complete digital economic ecosystem combining payments, e-commerce, blockchain, and community engagement. By merging AI and blockchain with real-world commerce, we aim to reshape how people interact with digital finance.
